

Astrobiology  
Society of  
Britain

# ASB7

**13-14 September 2017**

The seventh biennial conference of the Astrobiology Society of Britain (ASB7) will take place in the Berrill Lecture Theatre at the Open University from 13-14 September 2017.

Astrobiology is a multidisciplinary topic that brings together many branches of science, including astronomy, astrochemistry, astrobiology technology, biology, chemistry of life, development of life-forms in other environments, exoplanets, extremophiles, geomicrobiology, habitable zones, humans in space, life's origins, Mars, meteorites, microbial communities, origin of complex organics, panspermia, planetary protection, prebiotic climates, public engagement, SETI. ASB7 will address these topics and more.

We are planning a possible early career scientists event on the 12<sup>th</sup> September (TBC).

Accommodation will be made available close to campus (details to follow).
