

ASB Summer Internships 2025

Award amount: up to £1000

Date opens: 7th February 2025

Date closes: 28th March 2025

The Astrobiology Society of Britain is able to provide some limited financial support for undergraduate or MSc/MSci research internships in the UK that fall within the field of astrobiology. Internships can offer undergraduate or MSc/MSci students valuable research experience while also providing a window into potential career paths.

Internships must be hosted by a UK institution. Some examples of UK institutions that have carried out astrobiology research in the past and present are listed [here](#) and many have hosted ASB interns before. Please note, this list is not exhaustive; any institution or researcher involved in astrobiology and related fields is eligible.

Funding is only available for those studying at UK institutions, and who will be hosted at a UK institution. This grant is considered as an additional contribution to support a student-led summer project. Applicants will need to provide a broad justification for resources requested. Additionally, successful applicants (or their advisor) will be expected to complete a short report at the end of their project detailing the outcomes of the project for inclusion in the ASB newsletter, and on our website. Internship reports from previous years can be found [here](#). Proposals will be reviewed by the ASB committee and successful applicants will be informed within ~3 weeks of the closing date listed above.

Please complete the template/form [here](#) and return to astrobiosoc@gmail.com with the subject line 'Summer Internships 2025' by the closing date listed (28/03/2025).

ASB Summer Internships 2025

Application Form

Name:

Advisor(s) and Host Institution:

Expected Start:

Expected Length of Internship (approx. 4-10 weeks):
